# GRINDER HOG GH2

GRINDING, GROOVING, RUMBLING

## ADVANTAGES

The Grinder Hog GH2 features a grinder head on each side of the truck that is capable of extending outward up to 13" from the chassis with a head extension option extend up to 36". The grinder head supports a variety of PCD grinding teeth for different finish profiles.

The Grinder Hog GH2 does **not** require a CDL license to operate.

With our Low-Speed Control, the Grinder Hog GH2 can grind at speeds up to 6 MPH without having to check between the crosshairs and the speedometer, greatly reducing the margin for error.

The Grinder Hog GH2 comes with a computer controlled profiling (or CCP) package for on-the-fly adjustment of your skip line or recessed reflective pattern.

The simultaneous vacuum recovery system of the Grinder Hog GH2 utilizes a 2,200 CFM positive displacement blower coupled with our latest noise reduction technology. The debris is collected in a 4 cubic yard usable debris tank that dumps to the rear.
