STRIPE HOG SK3000

RUBBER AND PAINT REMOVAL

ADVANTAGES

The Stripe Hog™ SK3000 is an skid-mounted, auxiliary-driven water blasting and recovery system designed for either asphalt or concrete roadways and airfields. The SK3000 comes standard with our HT2500 Hog Rider allowing you to operate up to 300' (91.44 m) away.

The SK3000 is equipped with ultra-high pressure needle sharp water blasting jets creating up to 40,000 psi (2,750 bar) and up to 7.8 gpm (29.5 lpm). It uses ordinary fresh water without chemicals or detergents, along with a vacuum recovery system. Separating water from solids, it processes the reclaimed water for safe and easy disposal of the solid debris.

With a large water and debris tank capacity the SK3000 can stay on the job for several hours before dumping or replenishing with fresh water. Our dewatering system filters the reclaimed water up to 100 micron for safe and easy disposal of the solid debris.

SPECIFICATIONS

OPERATING PRESSURE: 40,000 PSI (2,750 BAR)

FLOW RATE: 7.8 GPM (29.5 LPM)

BLASTING WIDTHS: 6"-48" (15.2-121 cm) Standard as a single head

WATER CAPACITY: 1,050 gallons (3,975 liters)

DEBRIS CAPACITY: 1,200 gallons (4,542 liters), 2,250 gallons (8,517 liters) with optional bladder bags

VACUUM: 4" @ 750 CFM or 6" 1,400 CFM

RUBBER REMOVAL RATE: 26,000 sq. ft/hr (2,415 m²/hr)

MARKING REMOVAL RATE: 4,225 linear ft/hr (1,287 linear meters/hr)
